ABOUT ME

Seasoned web developer boasting a decade of rich experience in computer science and a specialized mastery over React, honed over three rigorous years of professional engagement. My passion for continuous learning and innovation is mirrored in my commitment to surmounting complex challenges and contributing significantly to organizational growth. Colleagues often acknowledge my innate ability to lead and inspire, a testament to the combination of expertise and enthusiasm I bring to every project. I am devoted to fostering an environment of collaborative learning where knowledge transfer is seamless and collective growth is prioritized. As a professional who consistently aims to exceed expectations, I am always looking to embrace emerging technologies and innovate, seeking to catalyze personal and organizational excellence.

SKILLS

JavaScript – React.js – Next.js – Redux – tRPC – Prisma – Git – Django REST Framework – Docker

TECHNICAL EXPERIENCE

Senior Frontend Developer   **11/2022 — Present**
Extend   *Canada*

Extend, a fintech startup, revolutionizes B2B SaaS cash collections by automating and streamlining account receivables and payment workflows.

- I've meticulously revised and refactored legacy code, infusing modern programming paradigms and efficient algorithms to ensure optimal performance, maintainability, and scalability. My precision and attention to detail have resulted in a harmonized, clean codebase, laying a robust foundation for future developments.
- Leading the initiative to transcend the conventional, I spearheaded the migration from a standard UI component library to a sophisticated blend of custom-created UI elements and a novel library. This transition, orchestrated with finesse, ensures a unique, intuitive, and engaging user experience tailored to our audience.
- My role is characterized by a synergistic collaboration with the design team. By fostering an environment of open communication and creative freedom, I've facilitated the seamless translation of their innovative designs into functional, user-friendly interfaces. This close-knit partnership ensures the realization of aesthetic and functional excellence, unmarred by technical limitations.

Full Stack Developer   **11/2020 — 11/2022**
Inspection   *Australia*

Inspection delivers precise defect reports for structures in mines and large industries, aiding in enhanced safety and maintenance.

- Spearheaded the selection of cutting-edge technologies and engineered both frontend and backend systems, ensuring seamless integration and optimized performance.
- Utilized diverse React component libraries and Redux for effective data management, elevating the user experience and development efficiency.
- Gained extensive knowledge and experience in JavaScript ES5/ES6/ES7, enabling the development of modern and sophisticated web applications.
- Refined and applied DRF expertise to optimize API responses, ensuring streamlined and rapid data processing and retrieval.

Back-End developer   **12/2019 — 11/2020**
tymr

Tymr is a user-friendly time management tool designed for simplicity and efficiency.

- Utilized Django Rest Framework to create efficient APIs, ensuring seamless front-end and back-end communication.
- Designed and executed Django models, enhancing API-database interactions.
- Successfully launched the project on a PAAS infrastructure using Docker and Docker-compose.

Digital Solutions Specialist: Web Designer IT Support Engineer   **07/2008 — 09/2018**
Dinaweb   *Qazvin, Iran*

Dinaweb, a versatile software company, specializes in a broad array of services, including web design, app development, and software maintenance.

- Designed aesthetic websites using CMSs and developed Android applications, offering tailored digital solutions.
- Delivered comprehensive support, resolving a range of software, hardware, and network issues for diverse clients.
- Effectively managed team tasks and deadlines, ensuring a collaborative and productive work environment.

ACTIVITIES AND CERTIFICATIONS

CS50x Harvard Computer Science, Harvard University CS50X,	December 2020
Django, Sharif University of Technology,	August 2020
Web Development with Python and Django, maktabkhooneh.org,	August 2020
Advanced Python Programming, maktabkhooneh.org,	February 2020
Certified Ethical Hacker (CEH), maktabkhooneh.org,	October 2020

EDUCATION

Bachelor of Science in Computer Science, *Isfahan Azad university*
